FACIAL SERVICES

Regardless of your age or gender, if you want your skin to look its best you have to take care of it. A facial does for your skin what a month of exercise and good nutrition does for your body – noticeably improve its look and feel. Regular facials (especially with an active home-care routine) will help prevent breakouts, keep your surface cells newer and healthier, and thereby ensure that your skin looks and feels at its very best. You do not have to remove make up prior to the facial although it is preferable.

WAXING SERVICES

Waxing is a temporary method of hair removal which removes the hair at the root. New hairs do not grow back in the waxed area for three to eight weeks. Almost any area of the body can be waxed, including eyebrows, face, bikini area, legs, arms, back, abdomen and feet. Waxing is accomplished by spreading a wax combination thinly over the skin. A cloth strip is pressed on the top and then taken off in a quick movement. This removes the wax along with the hair and dead skin cells leaving the skin smooth. New hair growth in waxed areas is soft and fine, not sharp and coarse like shaved hair.

You should ensure that the hair to be waxed is a minimum of around 0.75cm - 1cm so that the wax will take to the hair effectively. This is normally around 2 weeks post-shaving growth for most ladies or 4-6 weeks post waxing.

EYE SERVICES

Emphasise the beauty of your eyes by defining them with eyelash and eyebrow tinting. Both the eyebrow and eyelash tinting treatment will last about four to six weeks. However, you can build upon your tints to keep the look from fading over time. Particularly beneficial for people who participate in sporting activities, especially swimming. Unlike mascara the effect is very natural - so no more panda eyes!

For eyelash tinting you are required to have a Tint Test prior to any treatment this must be carried out 24 hours prior, it is advisable that contact lenses are also removed.
